

Project Documentation

Group 2: Adilet Zholbarys., Ablaihan Zholdasbekov., Timur Temirbekov

TS-2001/TS-2002

OVERVIEW

Project Title: Final Project	
Project Description:	By manipulating DOM objects, display the winner on the page and a score list of the game.
Members and their roles	Adilet Zholbarys, Ablaikhan Zholdasbekov, Timur Temirbekov. Adilet Zholbarys- script.js, app.js, home page html(20%), Ablaikhan Zholdasbekov- Home(60%),About page html/css, Timur Temirbekov – home page html/css(20%)
Communication strategy	Group channel on Telegram, meetings in Discords, meetings – real life
Motivation	to create a good constructed website with a neat design that by manipulating DOM objects, display the winner on the page and a score list of the game.
High-level project scope	We have created a new website from scratch
Target audience/market	The review of the website is aimed at sports fans
Tutor:	Aldiyar Salkenov

Project goals and team interests

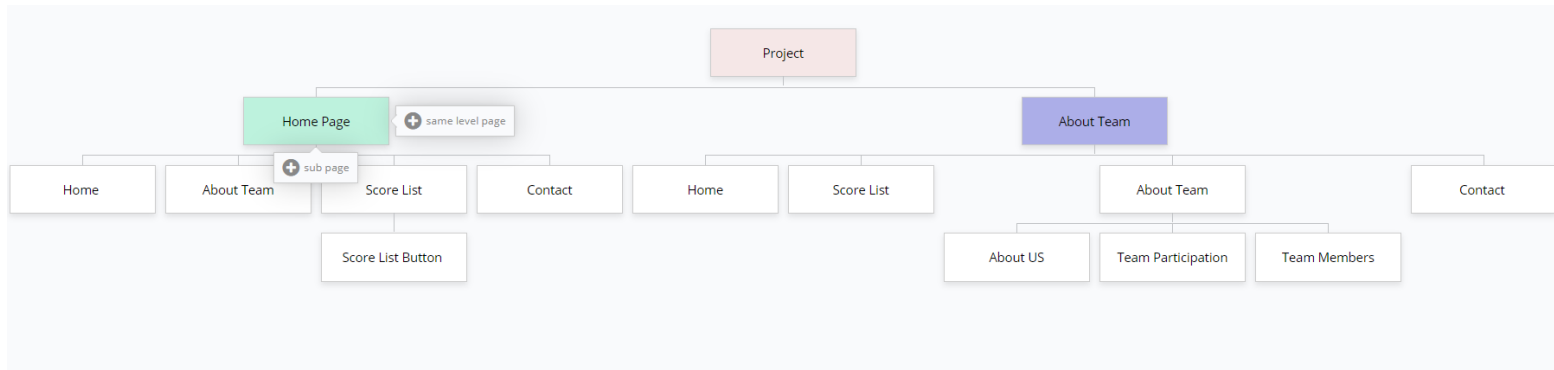

Project goals	<ul style="list-style-type: none"> ❖ Create a high-quality website about football ❖ Improve programming skills
Team interests	<ul style="list-style-type: none"> ❖ Understand HTML tags and CSS by building a football website ❖ Improve team working skills by collaborating with different members of the group

Phases

- Phase 1- Basic football website with HTML/CSS, JavaScript, express.js (Currently).
- Phase 2- Add styles to improve the appearance and thus draw wider audience

- Phase 3- Adding all sports to the website interface. Count cups, trophies, team goals.
- Phase 4- Adding a team's game schedule.

Content Structure

Design

- Reference links | none
- Image files | <https://yapx.ru/v/PMzXB>
- Video files | none

Hosting

- Creating a new repository
- Adding files
- Copy link

express.js	11.17.21	11.18.21	1
documentation	11.18.21	11.19.21	1

Summary

To sum up, we would like to say that the project was interesting, during the development we faced various problems. For example, we didn't like the design of the project and had to redo everything again. There were disagreements in our general group, but these are working moments and we overcame them. We can say with confidence that we have achieved all our goals and the project will fully justify our hopes. Functions, design, everything works as we wanted. At the end of the course, we would also like to add that web-technologies is one of the most useful courses that we have taken. We chose this course as an elective, and all our hopes were fulfilled. In the future, we will continue to study this course in depth, maybe even work together with the team.
